The high resolution cores that were used for the EMBM were collected in 2005 by EPA's contractor Malcolm Pirnie. The 2008 low resolution coring program was conducted by the CPG.

Hi Eugenia,

Do you know who conducted the additional sediment sampling that was done for the EMBM - I think in 2007 or 2008? Was it HydroQual or CPG or someone else? Just trying to label it correctly in my files. Thanks!

- Reyhan.
